

SWAN™

# SADDLE STOOL

Microscope  
Chair

# Microscope Chair

According to the principle of bionics designed saddle-shaped seat, after people sit up, its special structure makes people's back naturally up, which helps to maintain the health of the waist, the thighs have more space to move, and there is a feeling of galloping horses when sitting on the chair.

## Parameter

Part name	Parameter
Air rod specifications	160 mm
Minimum distance from the ground for the seat cushion	660 mm
The highest distance from the ground for the seat cushion	790 mm
Aluminum foot diameter	Φ600 mm
Wheel diameter	Φ65mm
Chair gross weight	20.7kg
Package size	630 x 590 x 480mm

# Ergo Rider

The "horseback riding style" sitting posture can reduce the interference with the body's metabolism, in line with the principle of ergonomics, can keep the lumbar spine in the correct position, help relieve lumbar disc problems and back pain, strengthen the back muscles, and minimize the risk of physical diseases.

## Parameter:

Part name	Parameter
Air rod specifications	160 mm
Minimum distance from the ground for the seat cushion	610 mm
The highest distance from the ground for the seat cushion	800 mm
Aluminum foot diameter	Φ600 mm
Wheel diameter	Φ65 mm
Chair gross weight	11.20 kg
Package size	630 x 590 x 480mm

# Ergo Foot

The "horseback riding style" sitting posture can reduce the interference with the body's metabolism, in line with the principle of ergonomics, can keep the lumbar spine in the correct position, help relieve lumbar disc problems and back pain, strengthen the back muscles, and minimize the risk of physical diseases.

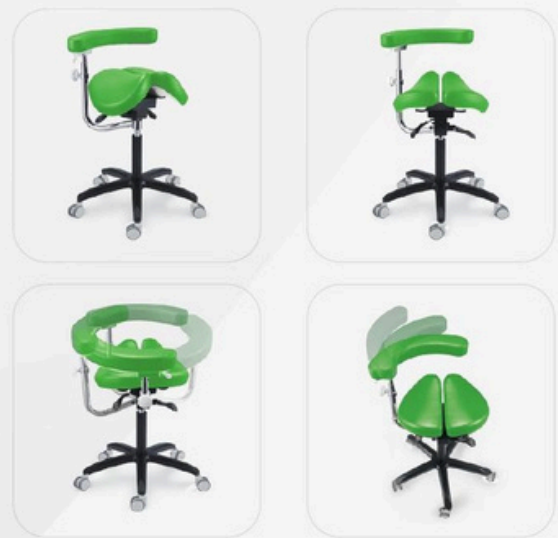

## Parameter:

Part name	Parameter
Air rod specifications	160 mm
Minimum distance from the ground for the seat cushion	600 mm
The highest distance from the ground for the seat cushion	710 mm
Aluminum foot diameter	Φ480 mm
Wheel diameter	Φ40 mm
Chair gross weight	13.55 kg
Package size	630 x 590 x 480mm

## Ergo Curve

According to the principle of bionics designed saddle-shaped seat, after people sit up, its special structure makes people's back naturally up, which helps to maintain the health of the waist, the thighs have more space to move, and there is a feeling of galloping horses when sitting on the chair.
